CAREER OBJECTIVE:

Entry-level Data Analyst skilled in Python, SQL, Excel, Power BI, and statistics. Proficient in data cleaning, exploratory data analysis, data visualization, and dashboard development. Completed Data Analytics training at Besant Technology and currently pursuing Data Science with Generative AI and Agentic AI. Strong analytical and problem-solving skills, with a focus on translating data into clear insights to support business decisions.

TECHNICAL SKILLS:

Data Analytics: Power BI, DAX, Microsoft Excel, PivotTables, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Interactive Dashboards, KPI Analysis.

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn).

Databases: SQL, MySQL, Joins, Aggregations, Subqueries, Window Functions, CTEs, Stored Procedures.

Machine Learning: Scikit-learn, Regression, Classification, Recommendation Systems.

Statistics: Descriptive Statistics, Hypothesis Testing, Correlation Analysis.

Tools: Stream lit, GitHub, Jupyter Notebook, VS Code, MySQL Workbench.

Soft Skills: Problem Solving, Analytical Thinking, Adaptability, Teamwork, Time Management.

PROFESSIONAL EXPERIENCE:

Data Analytics Trainee | Besant Technology, Chennai *July 2026 – Present*

- Completed training in Python, SQL, Excel, Power BI, and statistics.
- Applied Pandas and NumPy for data cleaning, transformation, and exploratory data analysis.
- Created interactive Excel and Power BI dashboards to analyse sales trends and business performance.
- Used SQL joins, subqueries, aggregations, and window functions to retrieve and analyse data.
- Currently pursuing Data Science with Generative AI and Agentic AI.

Project Intern | Green Resource Solutions *January 2026 – April 2026*

- Applied machine learning techniques to analyze sensor data and identify potential safety hazards in LPG and biogas stove systems.
- Developed automation code to trigger alerts and activate gas shutoff based on detected conditions.
- Implemented AI-based monitoring to track gas, smoke, flame, and human-presence sensor readings.
- Evaluated system responses during testing and documented observations to assess monitoring and automation performance.

DATA SCIENCE & ANALYTICS PROJECTS:

Tamil Movie Recommendation System *Python | Pandas | Scikit-learn | Stream lit*

- Developed a movie recommendation application using Tamil movie and user-rating data to help users discover relevant films.
- Processed data using Pandas and implemented recommendation logic with Scikit-learn.
- Designed an interactive Streamlit interface and deployed the application online for user access.

Sales Performance Analysis & Interactive Excel Dashboard *Microsoft Excel | PivotTables | Data Cleaning*

- Cleaned and analyzed 9,994 sales records to examine sales trends, profitability, and product performance.
- Built PivotTables and calculated key metrics, including total sales, profit, quantity, and profit margin.
- Created an interactive dashboard with charts and filters to compare product categories, state-level performance, and monthly trends.

Power BI Sales Analytics — Capstone Project *Power BI | DAX | Business Intelligence | Data Visualization*

- Developed an interactive dashboard consolidating revenue, profit, cost, orders, and customer metrics into a clear view of business performance.
- Created DAX measures for year-to-date revenue, previous-month revenue, month-over-month growth, and profitability.
- Designed regional and product-level visualizations to compare performance and identify areas for further business investigation.

RESEARCH & AUTOMATION PROJECT:

AI-Based Safety Monitoring & Automated Gas Shutoff System *Arduino | Sensors | Machine Learning | Automation*

- Developed and tested a safety monitoring prototype integrating gas, smoke, flame, and human-presence sensors for LPG and biogas stoves.
- Applied machine learning techniques to analyze sensor readings and identify potential safety hazards.
- Developed automation code to trigger alerts and activate a relay-controlled solenoid valve for automatic gas shutoff.
- Documented system design and testing findings; project research was published in the **International Research Journal on Advanced Engineering Hub (IRJAEH), April 2026**.

PUBLICATIONS:

Research Publication:

- "Sensor-Based Smart Gas Leak, Flame, Smoke and Human Presence Detection System with Automatic Shutoff for Biogas and LPG Stoves"
- *International Research Journal on Advanced Engineering Hub (IRJAEH)* | April 2026
- **DOI:** 10.47392/IRJAEH.2026.0301

Book Publication:

- **Author & Co-editor** — "தணினித்தும் நற்கும் அ ஆ"
- Tamil Poetry Collection | First Edition, September 2025
- **ISBN:** 978-93-49960-96-1

EDUCATION:

- **B Tech in Agricultural Engineering** **2022–2026**
  The Kavery Engineering College (Autonomous), Salem | **85%**
  Chosen Vertical: IT in Agricultural Engineering
- **Higher Secondary Certificate (HSC)** **2021–2022**
  AMMH School, Krishnagiri | **74%**
- **Secondary School Leaving Certificate (SSLC)** **2019–2020**
  AMMH School, Krishnagiri | **98%**

CERTIFICATIONS & TRAINING:

- **Data Science with Generative AI & Agentic AI** — Besant Technology (Currently Pursuing)
- **Data Analytics** — Besant Technology (Completed coursework)
- **Certified Innovation Ambassador** — Foundation Level, MoE's Innovation Cell & AICTE
- **Certified Innovation Ambassador** — Advanced Level, MoE's Innovation Cell & AICTE
- **Prompt Engineering Applications** — Simplilearn Skill Up
- **Getting Started with AWS IoT Site Wise** — Simplilearn Skill Up
